Product highlights

50 dB amplification

50 dB amplification boosts weak signals, expanding your reception range and allowing you to receive more signals over a greater distance.

UHF flat panel array

The highly efficient UHF flat panel array offers improved reception over conventional loop antennas. Due to the flat design, the antenna concentrates the signal for better reception.

Low noise amplification

Together with the adjustable amplification, low noise amplification ensures you of a great reception range and improves the quality of your signal.

Touch control with LED

Easy touch control increases or decreases amplification strength. Also confirms amplification strength at a glance.

Weighted base

The weighted base stabilizes the antenna's position so you enjoy more positioning choices.

A/B switch

Built-in selector switch makes it easy to change between viewing sources.

Design lines compliment TVs

Simple, elegant design lines compliment today's new TVs.
